ABOUT OMNIPURE

Omnipure Filter Company was established in 1970 by William Reid, an engineer who designed and built the world's first disposable inline water filter. Reid developed a simple carbon filter that could function efficiently and be reproduced with precision. The company's first product, the CL series, found widespread applications in commercial ice machines, water coolers, and coffee machines.

Continued Success

Originally founded in Long Beach, California, Omnipure eventually moved its operations to Caldwell, Idaho, USA. The company has continued to expand its offerings globally while maintaining all production in-house at its Idaho facility. Today, Omnipure produces over a dozen unique series of filters, offering solutions for various point-of-use water filtration problems. The company's sole facility in Idaho is capable of producing over 20,000 filters per day.

WHY CHOOSE OMNIPURE?

Innovation

Consistently evolving its products through engineering, rigorous testing, and in-field monitoring

Quality

Strong emphasis on quality throughout its manufacturing process and product line.

NSF®

Customer Service

Offering comprehensive customer service and support.

Les Agences T.L.S. is a proud distributor of Omnipure filters...

BEST SELLING OMNIPURE FILTERS

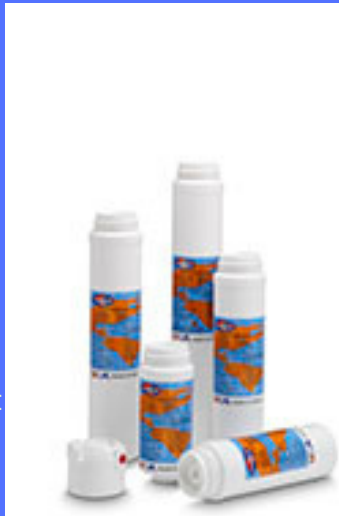

ELF-SERIES (EXTRA-LARGE FORMAT)

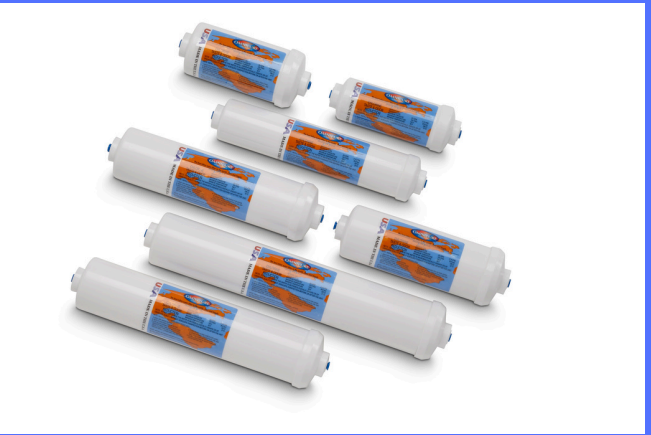

Specifically designed for high-volume applications in restaurants, cafes, and vending machines, the ELF-Series filters can handle up to 20,000 gallons with a flow rate of 2 gallons per minute. They reduce chlorine, taste, odor, and other contaminants while protecting equipment from hard water scale buildup.

Q-SERIES

Known for its ease of use and versatility, the Q-Series filters are ideal for commercial food and beverage operations. They feature a Twist Tap in-head valve system for automatic water shut-off during replacement and effectively reduce chlorine, taste, odor, and scale.

K-SERIES

A reliable option for compact spaces, the K-Series filters offer quick-connect fittings and customizable configurations. They are widely used in coffee shops and restaurants to improve water quality by removing chlorine, taste, odor, and suspended solids[1][2][7]

Filter	Criteria
ELF-Series	Chlorine, Taste, Odor, Cyst, Lead, Microplastics, PFOA, PFOS
Q-Series	Chlorine, Taste, Odor, Cyst, Lead, PFOA, PFOS
K-Series	Odor, Chlorine, Taste, Cyst, Lead

Can't decide on a filtration package? We can help you customize your own with Omnipure's range of inline filters, including ELF-Series for high-volume applications, Q-Series for ease of use, and K-Series for tailored needs.
